EDUCATION

Anjuman Institute of Technology and Management

Bachelor of Engineering (B.E.) in Computer Science & Engineering ; **CGPA: 7.7**

Bhatkal, Karnataka, India

Sep 2023 – Jun 2027 (expected)

Anjuman Pre-University College

Pre-University Education (PCMC); **79%**

Bhatkal, Karnataka, India

2023

Green Valley International School

Secondary School Education; **89.4%**

Shiroor, Karnataka, India

2021

SKILLS

Languages: C/C++, Java, Python, JavaScript, TypeScript, SQL

Technologies: Flask, Django, Node.js, React.js, MySQL, MongoDB, Git, Docker, AWS

Methodologies: Agile, Scrum, OOP, Functional Programming, DevOps, CI/CD, TDD

PROJECTS

CampusCast — College Digital Signage Platform | [Link](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, WebSockets, React Native

- Engineered a full-stack wireless signage platform streaming real-time content to 10+ campus displays with sub-1-second WebSocket latency.
- Built a web dashboard and companion React Native app enabling staff to schedule and publish 100+ content updates per day
- Designed and deployed MongoDB-backed RBAC, securing access for 50+ users managing 500+ content assets

Chess Bot | [GitHub](#)

Tech Stack: React.js, Vite, JavaScript, CSS

- Built a full-featured chess web app with a custom engine written from scratch — zero external chess libraries
- Achieved 100 percent legal move validation, including check, checkmate, stalemate, castling, en passant, and pawn promotion
- Implemented a 3-level Minimax AI with Alpha-Beta pruning (depth 3) to power the computer opponent
- Added undo and move-history tracking using standard algebraic notation

DecentraliTrack | [GitHub](#)

Tech Stack: Solidity, Polygon Amoy, React, Node.js, MongoDB, IPFS, Socket.io

- Made government infrastructure spending tamper-proof by engineering 3 Solidity smart contracts (escrow, RBAC, milestone verification) with automated 2-of-3 multi-sig auditor release on Polygon Amoy.
- Reduced citizen dashboard lag to under 1 second via a real-time blockchain event listener syncing on-chain state to MongoDB and broadcasting live updates via Socket.io.
- Abstracted all blockchain complexity from citizen-facing UX — users see rupee amounts and plain-language statuses with zero crypto jargon or wallet requirements.

ACHIEVEMENTS

- IEEE Student Chair** - Led the IEEE student branch, coordinating technical events, workshops, and student initiatives.
- 1st Place — PETRIX 2026 (National, 24hr):** Built DecentraliTrack, a Polygon-based government accountability platform with Solidity escrow contracts and live citizen dashboards.
- Top 6 Nationally + Side Quest 1st — Xypheria (National)**
- Top 20 Nationally — Hack Malanadu:** Presented ReviewIQ at a national-level hackathon.
